-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 04 October 2005.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, preamble, it is not clear how “for the implementation of a trick mode” fits in with the “method of transmitting” – is the method a “method of transmitting video data in a trick mode”? At line 3, it is not clear how the “step for comparing...” fits in with the rest of the steps? The structure of the claim is indefinite in that the preamble is not clear on providing the environment of the invention, but provides mixed messages, and includes a functional step.

In claim 2, it is not clear if the steps are performed with an assumption that computation is repeatedly performed between a series of two consecutive packets. If not, then the meaning of 'averaging the difference' is in question. Clarification is required.

In claim 8, the phrase is tangled and therefore is indefinite in its meaning – the usage of “and” and “or” should be reconsidered, and the phrase starting with “the parameters” should be rewritten to be incorporated into the rest of the recitation in a meaningful manner.

Claim 9 is indefinite in that it is not clear which one of the four categories of the patentable subject matter the claim falls in. Further, it is not clear exactly how the steps recited in claim 1 are mapped to the circuits recited in claim 9.

Claim 10 is indefinite in that the “device” recited depends from the method claim 8 – it is not clear what is being claimed. Further, “the computation circuit” lacks antecedent basis.

### ***Claim Rejections - 35 USC § 101***

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 1-8 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. In claims 1-8, the steps performed are abstract idea or “pure math” (i.e., “computation” and “addition”) and are not specifically tied to a practical application by physical transformation or physical application that produces a useful, tangible and concrete result. The background information for the recited steps are provided in the preamble, but the method as a whole lacks practical application with the end result of the method steps.

### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Hadad et al. patent, the Mani et al. PG Pub., the Porter et al. Patent, the Eckart et al. patent, the Hallberg patent, the Saeijs et al. patent, the Weaver

et al. patent, the DeMoney patent, and the Purnaveja et al. patent, are cited for further references.
